

Individual Proposal Report

Title Watershed plan (Big Chico Creek)

Number F219

Geographic Area Sacramento Tributaries/Big Chico Creek

Primary Stressor Addressed Land Use

Project Type Planning

Applicant Type Public/Non-profit Joint Venture

Recommended Funding \$276,631

Cost Share None

Description Recommended full funding of Phase 1 of the proposal for a three-phase watershed plan for Big Chico Creek. Species potentially benefiting from improved water quality associated with watershed management include several runs of salmon (including spring run) and other resident species. Water quality benefits would accrue for downstream resources as well. Total funding request for all phases was \$422,830 (Possible EPA funding).
